

# My Personal Profile:

## My Profile

A profile is an outline of information about you. You may already be familiar with having a profile on apps like Instagram or Snapchat. But there are other situations where you might have a profile as well. Some jobs have employee directories or webpages that have profiles of employees. Some employers also use apps that are similar to Facebook where employees have profiles too.

You should think about who will see your profile and what information about yourself you would want to share. You may be ok with sharing some information with your friends but not with your employer. Employers will often look at the public social media pages for a potential employee, so even if you consider an account mostly for fun, you should think about what information you share.

For this project, create a poster to be your profile that you can use in your display for your final project. Your profile may be seen by the other students in your program, your instructors, your parents, other students' parents, and anyone else who might be at the event.

You can design your profile any way you want. It can look like a social media profile or it can be something else. The only requirements are that it includes your real name and either a picture or drawing of you or a drawing or picture of something that represents you to be your "profile picture." You can include info about yourself, your interests, your personal story, anything you like.
